

# One Platform. One Interface.

Beginning in 2001 we ensured our software and appliances were cloud managed enabling you to more efficiently manage your deployments and multi-site environments from one simple interface. ClearOS provides a wide variety of IT functions for Cloud, Gateway, Network, Server and more; all built into one platform. We've designed ClearOS to be managed through Webconfig using any browser. This means you boot up your access device of choice and have all the tools at your fingertips you need to keep your system running. Make adjustments from your laptop in the office or from your smart phone on the road.

## Clean, Simple Webconfig

ClearOS delivers a simple & beautiful browser-based interface. Leave the black screened world of command line interfaces behind. With ClearOS Professional, anyone can learn to manage their IT environment.

# Robust VPN Features.

Get one of the most complete VPN systems. Make your network act as one even if you are running remote offices in different parts of the world.

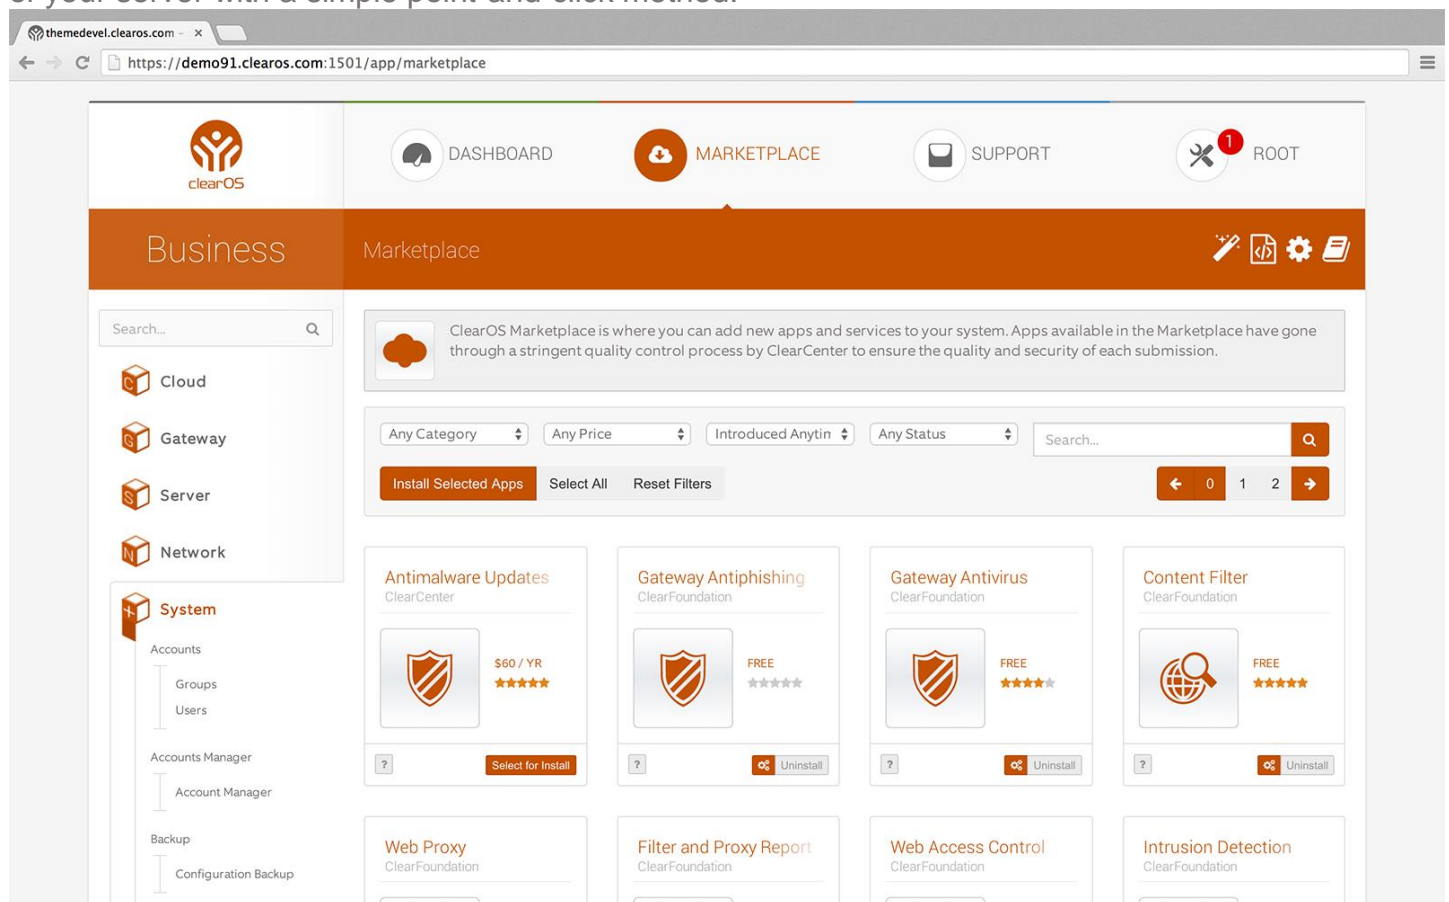

- **Dynamic VPN** - Utilize IPsec VPN to manage dynamic IP addresses
- **OpenVPN** - Provide secure remote access to your local system
- **PPTP VPN** - Set up your VPN with a PPTP connection

## ClearOS Marketplace

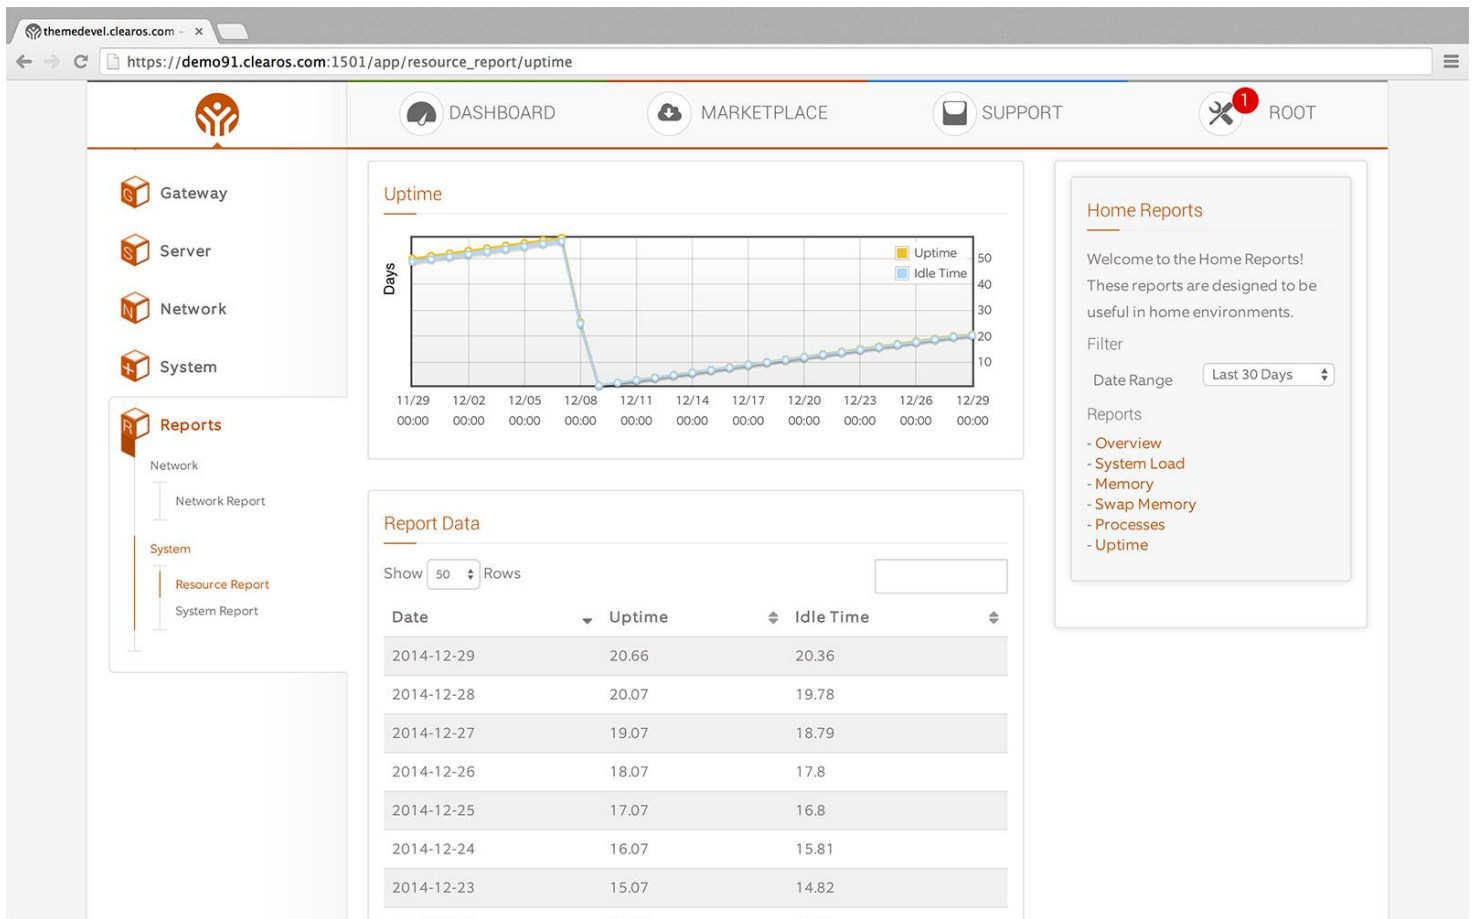

ClearOS Business is the most versatile IT Operating Platform ever created. ClearOS includes IT functions from access point control to 3rd party, cloud application management.

The 75+ IT Functions built into ClearOS are delivered as apps, which you install as needed on your ClearOS server. Integration with existing cloud apps and service, combined with the delivery of new and dynamic cloud apps and services, makes managing your IT even easier.

ClearOS also provides the needed on premise functions for your server, networking and security needs. ClearOS is equipped with the ClearOS Marketplace which allows you to scale the functionality of your server with a simple point-and-click method.

The screenshot displays the ClearOS Marketplace web interface. At the top, there is a navigation bar with icons for Dashboard, Marketplace, Support, and a ROOT user indicator. Below this is a secondary bar with 'Business' and 'Marketplace' tabs. A left sidebar contains a search bar and a category tree with 'Cloud', 'Gateway', 'Server', 'Network', and 'System' (which is expanded to show 'Accounts', 'Accounts Manager', and 'Backup'). The main content area features a descriptive text box about the marketplace, followed by filter controls for category, price, introduction date, and status. Below the filters are buttons for 'Install Selected Apps', 'Select All', and 'Reset Filters', along with a pagination control showing 0, 1, and 2 items. The marketplace displays a grid of application cards, each with a title, provider, price, and star rating. Visible cards include 'Antimalware Updates' (\$60/YR), 'Gateway Antiphishing' (FREE), 'Gateway Antivirus' (FREE), 'Content Filter' (FREE), 'Web Proxy', 'Filter and Proxy Report', 'Web Access Control', and 'Intrusion Detection'. Each card has a 'Select for Install' or 'Uninstall' button.

# Enterprise Grade Security

It's really quite simple, no one likes to feel as though your systems are at risk or that your data may be compromised. With the ClearBOX 100, Hybrid Network Appliance, protecting your network just got a whole lot easier.

ClearOS Professional keeps out unwanted viruses, spam and hackers, by offering you the latest in cutting-edge protection.

- **Antivirus** - Keep your entire network safe by filtering viruses at the edge
- **Antiphishing** - Protect your network from malicious links
- **Intrusion Detection** - Filters all traffic at the gateway
- **Contextual Analysis** - Intelligent analysis based upon page content
- **L7 Protocol Filter** - Analyze packets and filter IP, port or protocol
- **Access Control** - Apply time based restrictions to users & groups

# Data Recovery

Far too often businesses procrastinate on implementing the necessary steps to ensure your business is functional at all times. ClearCenter provides simple scalable solutions to fit the needs of any remote storage requirement; be it 5 GB – 500 TB of offsite data backup.

Another feature which is beneficial to ClearBOX users around the world is the Remote Configuration Backup. This snapshot of your system allows you to replicate these configurations across subsequent installations in your environment simply.

As the IT Administrator you decide when, what and how your system backs up and can rest assured that our global data centers keep your data secure and accessible at all times.

The screenshot displays the ClearCenter web interface for the Offsite Backup Service. At the top, there is a navigation bar with links for Home, Account, Systems, DNS, and Purchase. The main content area is titled "Offsite Backup Service" and includes a "System Management" sidebar on the right. The central panel shows the service status, including a "Subscription" section with details like "ClearOS Professional Edition, Premium" and "Expires: July 2, 2017". Below this is a "Recent Activity" table with columns for Description, Time, Backup, Transfer, and Speed.

Description	Time	Backup	Transfer	Speed
Backup successful	January 30, 2015 - 1:26	28.58 MB	0.0 B	0.0 B/sec
